### **Würzburger Versicherungs-AG relies in the future for its entire insurance business on IT solutions provided by Novum-RGI**

**As an IT partner, Novum-RGI is now also supporting Würzburger Versicherungs-AG in the replacement of its complete core systems. In the future, V'ger will replace the old system as the standard solution in all property lines.**

Würzburger Versicherung stands for high customer benefit with tailor-made insurance products. In order to be able to continue its successful course in the future, the Lower Franconian insurer will rely on V'ger P&C, the powerful standard software solution for the administration of the composite business, for its entire insurance business in the area of property and casualty insurance. The high flexibility and speed of product design will provide new impetus for intensive cooperation with brokers in the future.

As a multi-line system, V'ger P&C includes modern solutions for all types of insurance and comprises all the necessary core underwriting systems, which are operated on a single standard platform. Together with V'ger P&C, the other V'ger modules V'ger Party (partner and customer management), V'ger A&C (commission system incl. agent management) and V'ger C&D (collection and disbursement), as well as a modern printing solution, will also be introduced. The successful software implementation is ensured by a tried and tested process model, which Novum-RGI has continuously developed from a large number of successfully implemented projects.

*"We are convinced that Novum-RGI, with its established standard software solutions for the insurance market, will enable us on the IT side to master the challenges of digitization and successfully continue our course and goals."*, says Dr. Klaus Dimmer, CEO of Würzburger Versicherungs-AG, looking forward to the joint partnership.

Kai-Uwe Reiter, CEO of Novum-RGI Deutschland GmbH, describes why this partnership is a good fit: *"At Würzburger, we not only meet an insurer in the immediate vicinity, but also an innovative environment with very creative product ideas. Our solutions are a perfect match for this."*
